## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 4-10 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend upon another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Maissel et al. (Maissel) (US 2004/0049787 A1).

As to claim 1, Maissel discloses a method of controlling the program selection at the receiver (customization of the program guide; paragraphs 134-147) of at least one broadcast medium (television network; paragraph 101), in which a list of preferred programs (customized program listings based upon user preference; paragraphs 134-147) is managed in accordance with predetermined criteria (contained within preference

profiles; paragraph 134), and in which at least a part of the criteria is based on information about the program evaluation by other users of the broadcast medium (utilizing preference profiles from multiple users; paragraph 134 and 154).

As to claim 2, Maissel discloses wherein the program evaluation is gained from an inquiry of evaluation notes by other users (paragraph 124, 134, 154).

As to claim 3/1, Maissel discloses wherein at least a part of the predetermined criteria is based on information about:

explicitly predetermined user preferences (paragraph 124); and  
implicitly gained user preference (paragraph 123).
